

HTML----How To Make Lemonade

The main idea of the HTML project is to show the details and steps to make a lemonade, from shopping for lemons to create a perfect lemon juice or even lemon cocktail!

The headline will contains the title" HTML----How To Make Lemonade" with an artfont style. What's more, there should be the login function on the right side of the top.

On the left side there is navigation for the several steps that we can jump to when we click the title of steps. The navigation bar's background will have a lemon.

On the right side is the functions of the website, such as changing the language(German, English or maybe more), the text size or several background colors(original is lemon yellow).

Footer has the author information and an link to the thanks graph, which contains all the pictures or videos details and resources.
